My name is Connor and I'm a senior at Tomball Memorial High School. I am currently working on a year long engineering and research project for my fourth year engineering class.

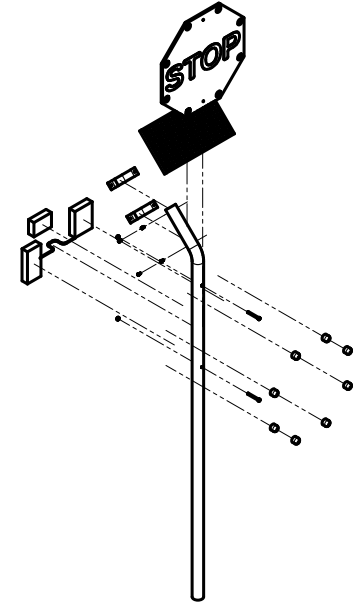

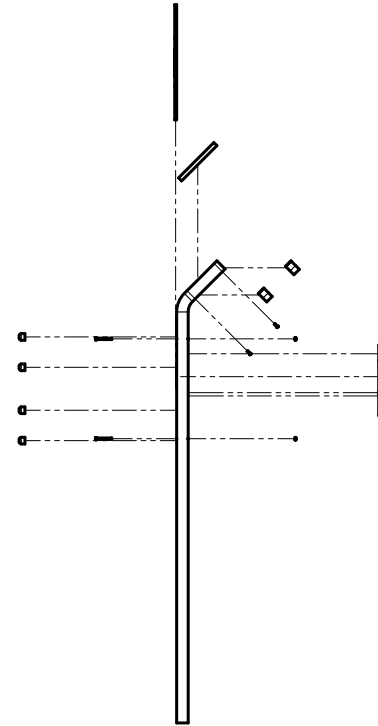

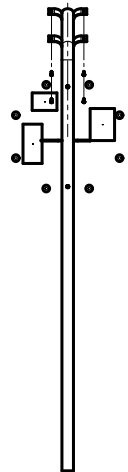

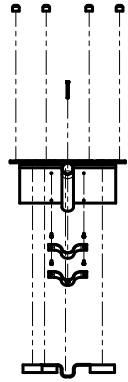

My team is researching intersection safety, with a focus on the improvement of stop signs and a reduction in right of way violations. We've been working on this project since August and are currently looking for support in creating a prototype of our solution, which can be found in the attached drawings.

Currently we are in need of solar panels, a critical component in our design. Any help that you could provide would be greatly appreciated. If you have any questions or concerns, please feel free to contact me.

Thank you for your time,
Connor Caudle
